

TRADE-IN OFFER FOR NOMADIX CUSTOMERS!!!

SPECIAL OFFER FOR USG II, HSG and AG 3000 CUSTOMERS

The Universal Subscriber Gateway II (USG II) and Hotspot Gateway (HSG) platforms are approaching their End-of-Support date. For the USG II and HSG no software upgrades will be available after November 30, 2007 and June 30, 2008 respectively.

Nomadix recently introduced the AG 5500 as a platform for the Nomadix Service Engine (NSE). The AG 5500 has a faster processor and more memory than the USG II (and HSG). The AG 5500 is the perfect solution for large, multi-cell venues and HotSpots with support from 250 up to 2,000 concurrent users.

To encourage our customers to transition to the AG 5500, Nomadix is offering a trade-in promotion **through December 31, 2007**. Customers, worldwide, who wish to trade-in their legacy USG II or HSG gateways or upgrade from an AG 3000 gateway and purchase an AG 5500, will receive **1 year** of Premium Nomadix Support Services **free – a \$720 value!** Premium Support Services includes 24x7 access to technical support, web based services, NSE releases and advanced hardware replacement. The Nomadix Support Services policy is available at www.nomadix.com/support for your review.

Conditions of promotion:

- Complete the Support Services Order Form and the Trade-in promotion form (see attached or obtain Trade-in Promotion form at www.nomadix.com) including the serial number of the USG II, HSG or AG 3000 trade-in unit and an authorized Signature.
- E-mail or fax the completed forms to your reseller along with your order for an AG 5500 and any additional modules required including Premium Support at no charge.
- Deploy the new AG 5500 and remove the USG II, HSG or AG 3000 trade-in unit from service within **14 days** from the purchase date.
- Nomadix will begin your 1 year of Nomadix Premium Support Services free - a \$720 value on this date.
- Trade-in Promotion cannot be combined with any other promotion or special product pricing.

AG5500
